

29AN1955 MILLAH MURRAH KLOONEY K42 (AI) (AMFU-NHFU-CAFU-DDFU)

Ben Simpson

Klooney K42 at 19 months

Klooney K42 was the 2nd highest selling bull at the Millah Murrah sale in September at \$80,000, making him the 5th highest selling Australian Angus bull of all time.

Klooney is the first calf of Prue H4, arguably the best Emperor daughter to turn up in the breed thus far. She was the most sought after donor in the Millah Murrah autumn ET program. On inspection in September and looking at the photo it is easy to see why. She is a cow that exhibits magnificent structure, huge capacity and massive volume with an outstanding Reality calf at side.

Following the pedigree back, the grand dam, by Time On, brings 24J into the equation. The great grand dam by Woody W100 was the \$22,000, 3rd high selling female from the record setting 2013 Millah Murrah cow sale, her son having sold as the \$24,000 high priced bull at the 2012 sale.

And of course, everyone recognises Theo as a master dam sire, with the much admired Megaforce high up in the pedigree. So when Theo combines with the class of this higher performance Emperor daughter it is no surprise to see the style and superior structure that Klooney displays. To observe, Klooney is a free moving bull, with good outlook and pleasant disposition. He has a beautiful soft skin and fine hair type with the high C+ muscle score that the industry desires of the Angus breed. He is kind of hard to fault.

Klooney should become a go to sire for many seedstock and commercial heifer programs based on his great EBVS for

CE, GL and BWT. Throw in his actual 36 kg BWT, his impeccable structure and the fact that Klooney, his dam and grand dam all carry the title of "heifer's first calf" and the strong calving ease EBVs are reinforced.

Klooney is clearly a bull with **massive cow maker credentials**. He provides a wide range of joining options for recent high use lines like Regent, Equator A241, Ada, Admiral A2 and Berkley. The industry has been crying out for a bull like this for some time.

(See page 28 for special commercial rates on semen).
