*"We strongly believe this bull is a game changer in the traditional sector. There never has been a bull to have had a bigger impact as Radar on our VC traditional program. The calves come small & thick with a predictable colour pattern & eye pigment plus with the added bonus of docility, softness and is looking to have positive fat over in his calves at this point in time. All calves having a true sire's head, broad muzzle with the added bonus of all being polled."*
