Modified High Performance Genetics

- For those who missed out on Comstock, here's the next sire with more performance and scale
- His dam is an ideally designed young first calf heifer that is setting the bar in the large Connealy contemporary groups
- This big scrotaled, big hipped, big topped individual offers a sweeping rib cage and stands on a near perfect foot
- Seen during our 2025 US Beef tour inspection he has developed into a powerfully made and framed individual
- A sire to admire due to the strength and width of spine, smooth through the shoulder, strong chined with excellent tail head placement and a great disposition
