A genética desempenha um papel cada vez mais estratégico na pecuária, onde eficiência e viabilidade econômica são essenciais para o sucesso. Sabemos que não existe a melhor raça ou o melhor touro, mas sim o indivíduo mais adequado para atender às necessidades específicas de cada projeto pecuário.

Com as novas tecnologias disponíveis, o **Plano Genético** é o conceito mais moderno e aplicável que podemos oferecer, que consiste em identificar as matrizes, selecionando as melhores vacas para produzir a futura reposição, usando uma genética maternal, e otimizar as demais matrizes com uma genética terminal para potencializar o alto desempenho em ganho de peso. Assim garantimos o progresso genético do seu rebanho, produzindo novilhas superiores que melhoram os índices produtivos ano a ano.

A bateria de touros **Europeu Corte** da ABS oferece genética para diferentes objetivos: touros indicados para novilhas, genética maternal e terminal, características de carcaça, carne de qualidade com alto marmoreio e gordura positiva, além de excelente desempenho nos índices de desmama, final, carcaça e adaptação, conforme os diferentes programas de melhoramento genético. A genômica encurtou o caminho para encontrar os melhores indivíduos e vários touros possuem mais de uma avaliação!

A **fertilidade** é um dos grandes diferenciais da ABS, reconhecida pelo alto padrão de qualidade na produção de sêmen. Destacamos os touros certificados **IATFMAX**, além da exclusiva tecnologia **Fertility Plus**, que potencializa ainda mais os resultados reprodutivos.

Para atender à crescente demanda por genética especializada em programas terminais, a ABS disponibiliza a **SUPER DOSE**, com diferentes categorias genéticas, e o **Beef InFocus**, voltado ao promissor mercado de corte no leite. Ambos são programas exclusivos da ABS, desenvolvidos para proporcionar maior eficiência e rentabilidade aos pecuaristas.

Nossa equipe técnica e comercial está à disposição para ajudá-lo a encontrar a genética ideal para o seu projeto. **Garanta maior eficiência e resultados com a genética ABS!**

Fertility *plus*[®]

SAIBA MAIS

MAIS SEGURANÇA NOS RESULTADOS DE IATF EM SITUAÇÕES DE MAIOR DESAFIO

Maximize a fertilidade e a eficiência dos protocolos com uso do sêmen heterospérmico de touros com mesmo perfil genético.

O QUE FAZ

O Fertility Plus oferece mais segurança na fertilidade, principalmente na IATF, garantindo melhores resultados na inseminação. Produções homogêneas são frutos de uso de pacotes genéticos com touros que compõem o grupo com o mesmo perfil genético.

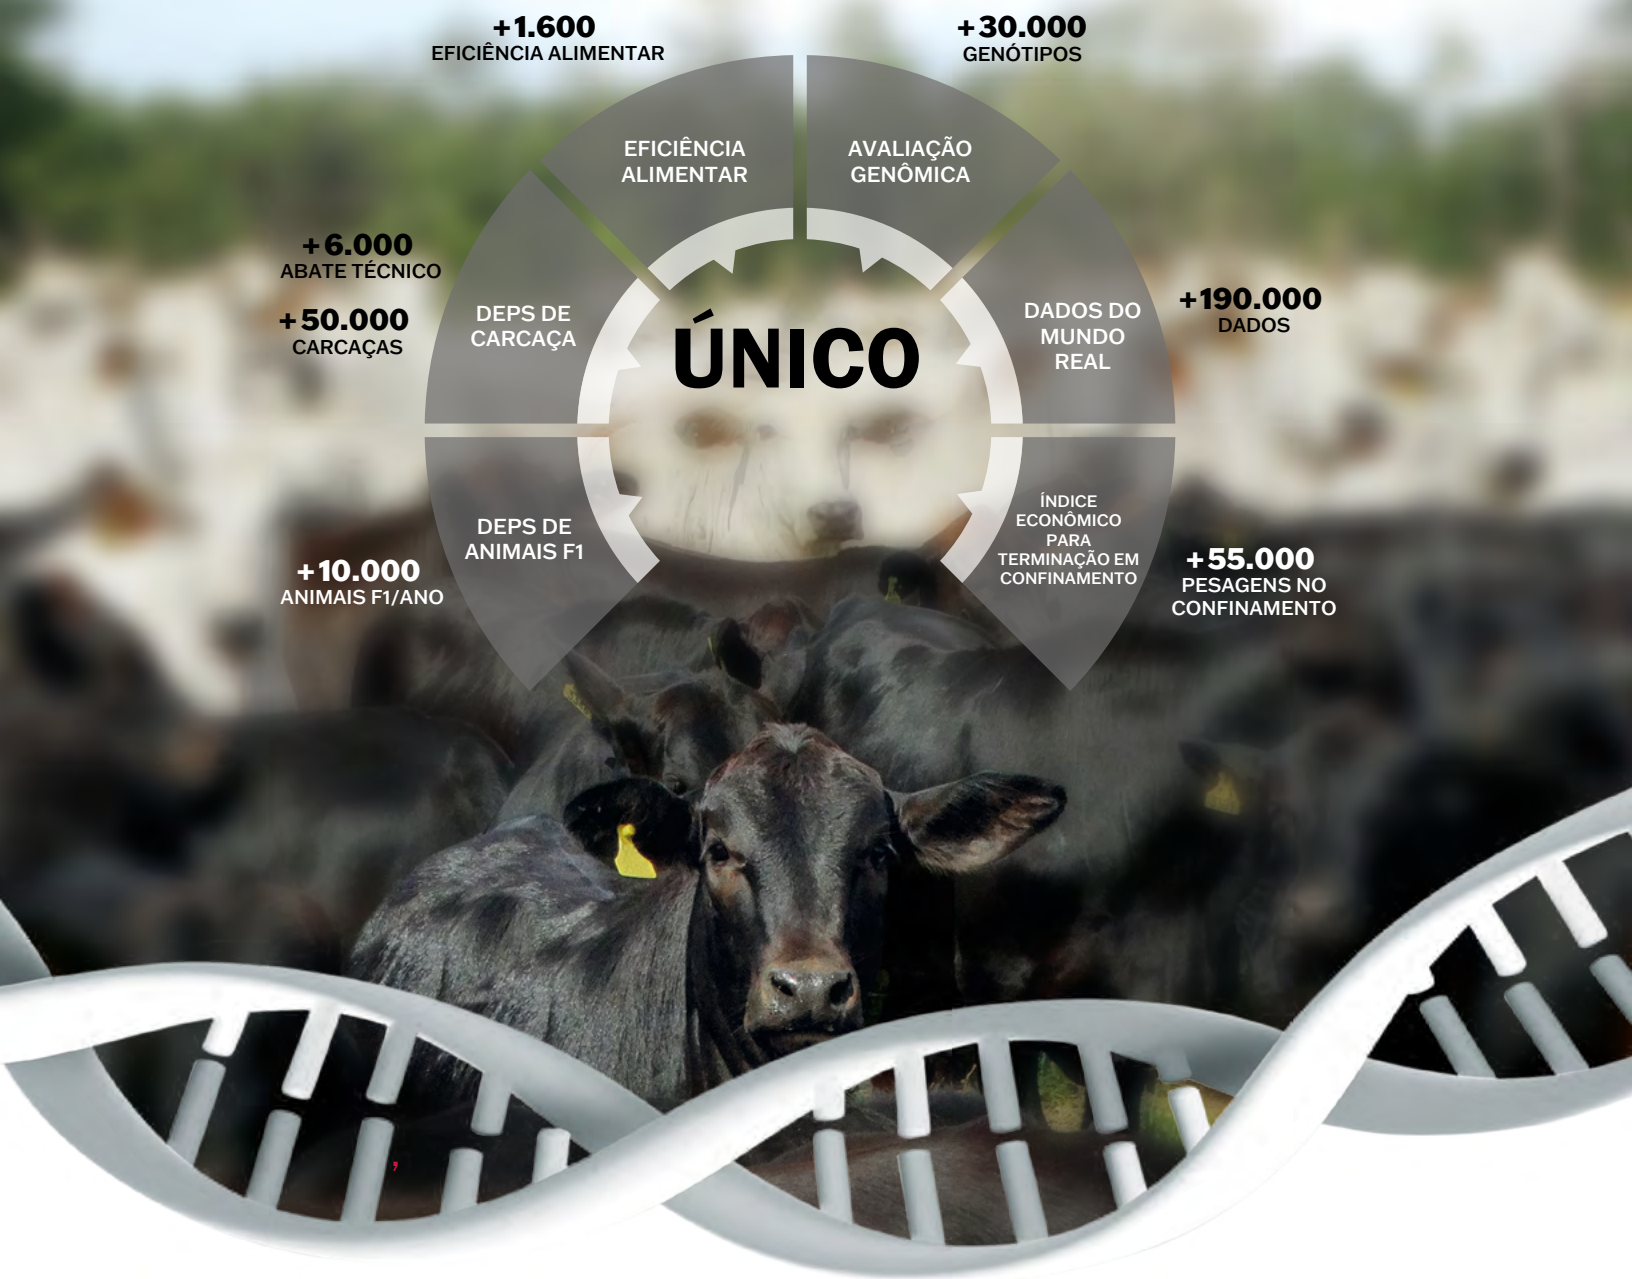

VALORES E BENEFÍCIOS

- Diminuição da variabilidade entre touros e partidas.
- Complementariedade de plasma seminal, proporcionando um ambiente melhor ao espermatozoide.
- Maior tempo de viabilidade dos espermatozoides no trato reprodutivo, pelo efeito de capacitação espermática

É INDICADO PARA

- Produtores com rebanhos em que a prioridade é a fertilidade
- Situações com maiores desafios, como:
 - Lotes grandes (acima de 200 vacas)
 - Primíparas
 - Vacas com baixo escore corporal

NUERA Genetics®

O NuEra Genetics surgiu a partir do DNA inovador e pioneiro da ABS Global. Em 2014, a empresa criou um núcleo genético de corte próprio, nos Estados Unidos, para auxiliar o pecuarista que trabalha com cruzamento terminal e impactar a cadeia da carne com mais rentabilidade, eficiência e sustentabilidade. O investimento de milhões de dólares resultou no desenvolvimento de uma marca global que produz genética superior e diferenciada, com índices, programas e avaliações exclusivas da ABS.

O NuEra Genetics está disponível através da SUPER DOSE e Beef InFocus, com sêmen heterospérmico, **Fertility Plus** – que combina o ejaculado de três touros com as mesmas características genéticas.

O nosso produto exclusivo tem como objetivo: maximizar a lucratividade terminal e as taxas de concepção.

Faça acasalamentos utilizando genética desenvolvida para desempenhar e impactar seus resultados financeiros.

NuEra Genetics também está disponível na **SUPER DOSE SEXADO MACHO**. Se seu objetivo é aumentar o resultado da sua pecuária, considere o uso desse produto ABS do nosso programa exclusivo NuEra. O produto sexado macho vai aumentar a sua produção de machos na fazenda, aumentando assim, o desempenho genético e valor do gado.

» Touro para produzir gado de biotipo pastoril, de baixo frame, menor estatura, menor manutenção, com grande capacidade ruminal, pelo seu comprimento, profundidade e arqueamento de costelas. De muita facilidade de parto e baixo peso ao nascer, por isso é indicado para novilhas, touro de alta fertilidade nas filhas e ótimo temperamento. Uma grande opção para produção de um Angus funcional, com fortes características maternas.
